

The Essential Ian McHarg
edited by
Frederick R. Steiner

INDEX

- Abercrombie, Patrick, 66–67
Adaptations, 87, 93, 124–25
Advertising, 130n5
Agricultural land, 25, 41–42, 44, 71–73, 77–78
Agricultural societies, 22, 110
Agriculture, large scale, 5
Air pollution, 80–81
Altruism and symbiosis, 56–57
American Society of Landscape Architects, 108
Andropogon, 107, 126
Animals, 96, 117t
Anthropocentrism, 4, 49
Anthropology, in human ecology, 91, 96–97
Anthropomorphism, 4, 8, 11–12
Aquifer recharge areas and aquifers, 44, 76–77
Art, 123–24
Atmosphere, 80–81
Atomic power, 2, 6
Audubon Society, 112
- Babbitt, Bruce, 129
Bartholomew, Harland, 123–24
Baseline data for ecological planning, 117t
Beamish, Richard, 130n5
Beauty, 8
Beaux Arts aesthetes, 124
Berger, Jonathan, 120, 128
Biological system inputs, 24
Biophysical evolution, 95
Biosphere, 57
BLM (U.S. Bureau of Land Management), 113
Boston open space plan, 66
Bramante, Donato, 105, 108
Brower, David, 130n5
Brown, Lancelot "Capability," 32, 105–6
Burle Marx, Roberto, 107–8
Bush, George, 116, 129
Bye, A. E., 107
- Capper Cromptin Act, 66
Carson, Rachel, 112
Champlain Society, 106
Chronology, in human ecological planning, 116, 125
- Cities, 5–8, 15–16, 26–28, 30, 34
Climate, 80–81, 96, 111, 117t
Coastal plain, in water regimen, 72–73
Coe Lee Robinson Roesch, 107, 126
Commoner, Barry, 112
Communities: ecological, 12, 35, 59
Community biology, 113
Community interaction matrix, 99
Consensual mapping, 98
Conservation Foundation, 112
Cook County Park System, 66
Creation and creativity, 48, 54, 56, 61, 87
Cultures, primitive, 7
- Dangermond, Jack, 107
Darwin, Charles, 93, 124
Data maps, 99
Defense Mapping Agency, 129
Denmark, 23
Design with Nature (McHarg), 122
Design Workshop, 107
Drought, 25–26
Dubos, René, 112
Dunes, 40–41
- Ecological communities, 12, 35, 59
Ecological design, 122–23, 126
Ecological determinism, 31, 34–38, 40–45
Ecological planning, 87–88, 106, 122–23. *See also* Human ecological planning
Ecological view of the world, 12–14, 48–50, 53–54, 60–61
Ecologists, role of, 39, 45
Ecology, 33, 91, 112, 122, 125–26
Economic determinism, 37, 50–52, 60–61
Ecosystems, 19, 82
EDAW, 107
Ehrlich, Paul, 112
Eiseley, Loren, 1, 18
Eliot, Charles, 16, 66, 106–8, 129–30n2
Energetic transactions, 92
Energy, as basis of life, 12
English landscape tradition, 8–9, 23, 32–34
Ethnographic history, 116–17

The Essential Ian McHarg

edited by
Frederick R. Steiner

- Entropic-misfitness-morbidity, 92, 94
Entropy, defined, 48, 92
Environment, the: current state of, 49–50;
deterioration of, 123; fitting-for-man, 60;
historic disinterest in, 112–13; in the media,
118; physical, 6–9, 21–22; as process, 12–13;
in public policy, 115; scientific knowledge of,
119; social value of, 88
Environmental groups, 119
Environmental Monitoring and Assessment
Program (EMAP), 127–28
Environmental science, and landscape
architecture, 108–9
EPA (U.S. Environmental Protection Agency),
112, 115, 127–28
Epidemiology, 91
ESRI, 107
Estuarine marshes, 25–26
Ethnography, 91, 96–98, 115–16
Ethology, 91
Evolution: as creative process, 47, 54–55; in
human ecological planning, 95–96; of
humans, 2–3; natural processes and, 10–11;
of power, 4–8; success measures in, 57;
symbiosis in, 61
Evolutionary imperative, 93

Farmers, and man-nature relationship, 23
Field design, 126–27
Fitness: defined, 93–94; in ecological view, 61;
and elicited values, 98; of environment for
life, 57–58, 99, 124; and form, 49, 58;
measurement criteria, 60; and natural
processes, 87
Flooding, natural restraints to, 25
Flood plains, 75–76
Floods of 1994, 111
Ford Foundation, 115
Forests, 44, 79
Form: and being, 49; and process, 58–59
Fosberg, E. R., 19, 22
Fragmentation: of government, 113–14; of
knowledge, 112–13
Franklin, Carol and Colin, 107, 126
Fuller, Buckminster, 92

Garden making, 31–32
Genetic value system, 11
Geographic information systems (GIS), 119–20
Geology, 95, 113, 117t
Geometrical planning method, 67
Gingrich, Newt, 120
Goddard, David R., 11, 19
Government, fragmentation of, 113–15
Greater London Plan, 66
Green Springs Valley, 41–42
Groundwater hydrology, 95, 117t

Halprin, Lawrence, 107–8
Hamblin, Steven, 124
Harvard University, 123–24, 129–30n2
Hazards, in human ecological planning, 101–2
Health: as criteria for fitness, 60; in human
ecological planning, 93–94, 101–2; planning
as measure and agent of, 89
Henderson, Lawrence, 57–58, 93, 124
Hubbard, Henry, 123–24
Human ecological planning: definition of, 91;
method of, 94–103; synopsis of, 115–16;
theory of, 90–94
Human ecosystems, 22–24
Humans: conceptions of, 1–4, 12; destructive
powers of, 4, 6; in human ecological
planning, 95, 117t; and natural processes,
10–11, 82, 101; role of, 8, 49; values of, 7
Hurricane Andrew, 111
Hurricane Hugo, 111
Hydrology, 95, 117t

Ill-health, as unfitness, 60
Instability, indicators of, 38–40
Instruments, fitness of, 59–60
Integration of natural processes, 115, 119–20
Interdependence, and survival, 12–14, 20
Inventory: ecological, 34–35, 61, 116, 119–20,
128–29; layer-cake, 95, 116
Italian villas, 104

Japanese agriculture, traditional, 22
Jones, Leslie, 107, 126
Jones & Jones, 107, 126
Judaic-Christian-Humanist tradition, 2–3, 50–
51

The Essential Ian McHarg
edited by
Frederick R. Steiner

- Kent, William, 32, 105–6
Key informant interviews, 98
Kimball, Theodora, 123–24
Knight, Richard Payne, 105–6
Knowledge, fragmentation of, 112–13
- Land and land use: causes of change in, 97;
 commodification of, as planning approach,
 67; determination of opportunities and
 constraints for, 99–100; in human ecological
 planning method, 98; physiographic
 phenomena and, 79–80t; recommendations
 for, 44, 77–78; utilization studies, 66
- Landscape architecture: eighteenth-century
 English tradition in, 8–9, 23, 32–34;
 environmental science and, 108–9; and
 fitness, 125; and garden making, 31–32; at
 Harvard University, 123–24; Italian villas
 in history of, 104; profession of, 124–25, 127,
 129; at University of Pennsylvania, 90–91,
 102, 116
- Layer-cake inventory, 95, 116
Lee, Gary, 107
Le Nôtre, André, 105, 108
Leopold, Aldo, 20
Leopold, Luna, 38
Lewis, Philip, 66
Light, in natural processes, 10–11
Ligorio, Pirro, 105, 108
Little, Charles E., 130n5
Living systems: characteristics of, 2, 12, 54–55;
 states of, 92–93
Loma Prieta earthquake, 111
Lorrain, Claude, 33, 106
- MacKaye, Benton, 66
Man. *See* Humans
Man-nature harmony, 22–23
Manning, Warren, 123–24
Marshes, 44, 75
Materialism, 51–52
Medical anthropology, 91
Membranes, 127
Mennhenick, Howard, 123–24
Metropolis, modern, 18, 23–26, 63. *See also*
 Cities
Metropolitan open space systems, 42–45, 74
- Microclimate, 80–81
Midwest floods of 1994, 111
Molecular biology, 112–13
Morbidity, 94
Morphology, appropriate, 34
Mumford, Lewis, 16
- Nader, Ralph, 112
NASA (National Aeronautics and Space
 Administration), 129
National Biological Survey (NBS), 112, 115, 127,
 129
National Ecological Inventory (proposed), 119–
 20, 128–29
National Environmental Laboratory (proposed),
 102
National Medal of Art, 129
National Oceanic and Atmospheric
 Administration (NOAA), 112–13
National park system, 106
National Science Foundation, 115
Natural communities, 12, 35, 59
Natural disasters, 111–12, 114, 119, 121
Naturalism, 10–12
Naturalist tradition, 2–3, 19
Natural processes: characteristics of, 87; in the
 city, 15–16; in ecological determinism, 35;
 experiment with, 10–11; geographic scale of,
 37; health and safety and, 101, 114; human
 intervention in, 82; and open space
 hypothesis, 63–64; unitary quality of, 82–83;
 value of, 36, 67–69; water and, 69–70
Natural science, in planning and design, 10–12,
 45, 114–15
Nature, 10–11, 47–48, 108; in the city, 26–28;
 conceptions of, 3; long ago, 16–18;
 regenerative powers of, 4–5; wild, 6, 20–22
NBS (National Biological Survey), 112, 115, 127,
 129
Negentropy, 47–48, 61
Netherlands, 41
New Jersey shore, 40–41
NOAA (National Oceanic and Atmospheric
 Administration), 112–13
Nolen, John, 123–24
Nonpriced benefits, 37, 52
Northbridge earthquake, 111

The Essential Ian McHarg

edited by
Frederick R. Steiner

- Occupational diseases, 101
Olmsted, Frederick Law, 106–9, 129–30n2
Olmsted disciples, 123–24
Open space, 42–45, 63–66, 74, 80–81, 83
Opportunities and constraints, 37–38, 99
Optimism, reasons for, 118–20
Organismic biology, 113
- Park planning, 66
Particle physics, 112
Pathology of stress, 39
Patrick, Ruth, 38, 60, 116
Paxton, Joseph, 106
Penn, William, 16
People-place descriptions, in human ecological planning, 98
Philadelphia metropolitan area study, 42–45, 70–80
Photosynthesis, 10–11
Physical environments, 6–8, 21–22
Physiographic-social regions, 98
Physiography, 79–80t, 95, 117t. *See also* Philadelphia metropolitan area study
Piedmont, the, 25, 71–73
Pine barrens, 72
Planners, role of, 86–89, 95
Planning: approaches to, 67; baseline data for, 117t; field of, 124; and health, 89; natural science in, 10–12, 35, 45, 114–15; parks, 66; regional, 106; at University of Pennsylvania, 90–91, 102, 116; values as factor in, 88–89; virtues of, 86. *See also* Ecological planning; Human ecological planning
Plants, 10–11, 96, 117t
Plate tectonics, 113
Pond, Bremer Whidden, 124
Population growth, 111
Poussin, Nicolas, 9, 33, 106
Pray, James Sturgis, 124
Price, Uvedale, 105–6
Primitive cultures, 7
Process, 12–13, 49, 52, 58–59. *See also* specific types of processes
Productivity, as value, 36
Prohibitions and permissiveness, 37–38, 99
Projections, in human ecological planning, 99
Prosthetic development, 127
Protection map, 100, 118
"Prototype Database for a National Ecological Inventory, A" (McHarg, Radke, Berger, and Wallace), 119–20, 128–29
PSMSA (Philadelphia Standard Metropolitan Statistical Area). *See* Philadelphia metropolitan area study
Public policy, environment in, 115
Public relations techniques, 130n5
- Radke, John, 120, 128
Reagan, Ronald, 116
Regional planning, 106
Reilly, William, 127
Renaissance, 8–9, 108
Replacement value concept, 36–37
Repton, Humphrey, 32, 105–6
Resources, 97, 101
Retgression, and entropy, 54
Riparian lands, 44
Rosa, Salvator, 9, 33, 106
- Sauer, Rolf, 107, 126
Science, fragmentation of, 112
Sears, Paul, 12–13, 19–20
Selyé, Hans, 20, 56
Settlement patterns, changes in, 97
Shenstone, William, 105–6
Sierra Club, 112
Slave mentality toward nature, 2
Smithsonian Institution, 112
Social epidemiology, 101
Social value system, 97
Soils, 96, 117t
Soleil, Le Roi (Louis XIV), 105
Species survival, 12–14, 20, 52–53, 55–57
Stability, indicators of, 38–40
Steep lands, 78–79
Stone, Edward, 107
Stress, pathology of, 39
Suburbanization, paradox and tragedy of, 63
Suitability, 100, 117–18
Surficial geology, 95, 117t
Surficial hydrology, 44, 74–75, 95, 117t
Survival, 12–14, 20, 52–53, 55–57
Symbiosis, 12, 20, 47, 55–57, 61
Syntropic-fitness-health, 90, 92, 94
